Science Week

Dear Parents/carers,

This week is the start of 'Science Week'. The theme this year is **'Curiosity: what's your question?'**. Over the next two weeks, the children are getting involved in an exciting science investigation led by what the teachers and children are curious about. They are also competing against each other as part of a 'Tallest Paper Straw Tower' competition – involving teamwork and problem solving.

In Monday's assembly, I shared some of *my* current curiosities! I spoke about a competition, which was brought to my attention, to design a prosthetic limb for a superhero! I was intrigued about prosthetics and wanted to learn more so a member of our school community, who has a prosthetic, very kindly agreed to be interviewed. I shared their inspirational story alongside the science behind it with the children. Now, I would love to hear what the children want to learn more about!

Easter Curiosity Challenge:

Over the Easter holidays, I would love the children to research, investigate, and ask questions about something that interests them, and then post their results on **Seesaw**.

Follow your curiosity! Investigate and explore anything that sparks your interest. You might try an Easter-themed experiment, explore melting or exploding reactions, create something new, solve a problem, or research a question you're curious about.

I'm excited to see your results and hear all about what you discovered or learned –there are prizes for the most amazing discoveries!

Mr Hine
