Dear parents/carers

As part of our topic 'Our Blue Planet', Year 4 have been making electric posters. The posters are part of the Design and Technology (D&T) curriculum and had to include an electric circuit.

In the past the components from these circuits have been 'borrowed' from school's Science resources and have been returned there once the D&T work was completed, meaning that children's work had to be taken apart so that the bulbs, switches, wires, etc could be retrieved. This year we have chosen to buy components for the projects (as cheaply as possible) with a view to children being able to take their project home 'in one piece'. This has however, cost school an additional €115.

If you would like your child to bring their electric poster home with its electric circuit still complete, we are asking for a voluntary contribution of €2.00 from yourselves to cover the cost of an LED, switch, battery holder, batteries, and wires. This is payable via ParentPay before the 19th of July for children to take home on 21st July.

Thanks in advance.

Y4 Team
