

The Programme

Positive Play was developed in 1997 to help children and young people with emotional and behavioral difficulties engage with their own feelings and raise their self-esteem. The programme is delivered through a series of structured activities and play, as play is a natural medium which helps children make sense of their world

The Ocean Room

Our Positive Play Support Programme has been successfully running since September 2007, and has had a positive impact on all those involved.

Children who access Positive Play do so for a round 25 minutes per session. The child will work with a specially trained teaching assistant on a one to one basis in our 'Ocean Room'.
